

# Low-Dose Aspirin for Dogs Dosage Chart by Weight

Weight-based calculation using 10 mg/kg

| Dog Weight (lb) | Weight (kg) | 10 mg/kg |
|-----------------|-------------|----------|
| 5 lb            | 2.3 kg      | 23 mg    |
| 10 lb           | 4.5 kg      | 45 mg    |
| 15 lb           | 6.8 kg      | 68 mg    |
| 20 lb           | 9.1 kg      | 91 mg    |
| 25 lb           | 11.3 kg     | 113 mg   |
| 30 lb           | 13.6 kg     | 136 mg   |
| 35 lb           | 15.9 kg     | 159 mg   |
| 40 lb           | 18.1 kg     | 181 mg   |
| 45 lb           | 20.4 kg     | 204 mg   |
| 50 lb           | 22.7 kg     | 227 mg   |
| 55 lb           | 24.9 kg     | 249 mg   |
| 60 lb           | 27.2 kg     | 272 mg   |
| 65 lb           | 29.5 kg     | 295 mg   |
| 70 lb           | 31.8 kg     | 318 mg   |
| 75 lb           | 34.0 kg     | 340 mg   |
| 80 lb           | 36.3 kg     | 363 mg   |
| 85 lb           | 38.6 kg     | 386 mg   |
| 90 lb           | 40.8 kg     | 408 mg   |
| 95 lb           | 43.1 kg     | 431 mg   |
| 100 lb          | 45.4 kg     | 454 mg   |
| 110 lb          | 49.9 kg     | 499 mg   |
| 120 lb          | 54.4 kg     | 544 mg   |
| 130 lb          | 59.0 kg     | 590 mg   |
| 140 lb          | 63.5 kg     | 635 mg   |

| Dog Weight (lb) | Weight (kg) | 10 mg/kg |
|-----------------|-------------|----------|
| 150 lb          | 68.0 kg     | 680 mg   |

**Formula:** Dose (mg) = body weight (kg) × 10 mg/kg. **Important:** This chart provides mathematical weight-based calculations only and is not an individualized dosing recommendation. A veterinarian should determine whether aspirin is appropriate, along with the dose, frequency, and formulation, for an individual dog.
